- Databases: **Couchdb** | **MongoDB** | **Postgres** | **SQLite** / **D1**
- Others: **Git** | **Docker** | **Linux** | **Markdown**

Currently building

Cofounder, CEO, CCO, senior developer @ Paguaitu

PAGUAITU EAS (Asunción, PY): We develop software to grow international sales with blockchain-assisted technologies combined with traditional banking for multi-rail payments and with multi-agent AI-driven technologies for marketing. Our first approach is for construction and real estate in Paraguay and Latin America, with a real estate and agricultural lands fund on the roadmap.

PAGUAITU Verein (Lugano, CH): The software cores and most of the plugins targeting informal and high-risk businesses are MIT licensed.

PAGUAITU EAS (Asunción, PY): The cloud version and other plugins addressing mid-size fully compliant businesses are proprietary software.

We don't reinvent the wheel but build on top of the most well maintained and funded open source software, such as [Trust Wallet Core](#), [BTCPay Greenfield API](#), [PayRam](#), [LiteLLM](#), and [Grok Build](#), and many API and MCP integrations.

Roles:

- Selected the executives team of 4.
 - Defined the roadmap.
 - Planned the legal structure.
 - Chief Compliance Officer for the VASP license.
 - Main **Nuxt/Nitro/Nodejs senior developer**.
 - Infra setup and **system admin (Docker nad docker compose on VPS)**.
-

Solopreneur @ Fantasia Latina

Fantasia latina RUC (Asunción, PY): I help SMEs from Paraguay to expand to the LatAm market with the AI-driven marketing tools and partially with the blockchain-based payment rails developed by Paguaitu Verein and with the logistical and legal structures matured in a decade of first-hand experience on the ground.

Fantasia latina LLC (Albuquerque, NM, US): On the roadmap I want to help international companies to enter the LatAm market with Paraguay as a regional hub.

Roles:

- Custom legal structures and logistic solutions, consulting and implementations.
 - Custom installations and integrations of the Paguaitu software.
-

BTCPay Server

BTCPay Server [core](#)

And [Tether plugin](#) contributor.

Former working experiences

Head of Operations, Head of Compliance, Developer

Peach SARL, Neuchâtel, CH, 2023-2026

Peach Bitcoin is a non-custodial and privacy-focused peer-to-peer (P2P) mobile marketplace for buying and selling Bitcoin on-chain.

Roles:

- Head of Operations: Handle the customer support team and relations with the community. Responsible for the supported payment methods.
 - Head of Compliance: High volume sellers KYC and monitoring.
 - Developer: In charge of the company website and the mobile app documentation (**html, js, css, md**) and contributor of the **expressjs** backend server with a **Postgres** database.
-

Backend developer

BTCP SRL, Brescia, IT, 2023-2024

Bitcoin People is a iOS, Android and web app developed in Flutter for instore and online merchants willing to bill clients in Bitcoin, on-chain and on Lightning Network with a self-custodial solution or converted to fiat with a custodial solution.

- Main developer of the backend server written in **Dart** with a **Postgres** database.
 - **BTCPay Server Greenfield API** integration and other third-party APIs integration.
-

Head of Disputes, Fraud & Compliance

LocalBitcoins Oy, Helsinki, FI, 2014-2023

Scaling from a team of 4 to a multicontinental team of 80+ in 10 years, generating revenues of about **60k BTC / 130M USD**.

Roles:

2021 - 2023

- Head of Disputes: Organized the work of a team of 3 members.
- Trained, supervised and reviewed the work of the other dispute analysts.
- Defined the dispute processes and the implementations for the developers.

2017 - 2021

- Processed disputes in multiple languages and cooperated in improving the disputes backend.

2015 - 2017

- Fraud and compliance analyst, processing users suspended by the fraud and ML prevention tools.

- Cooperated in improving these internal tools.

2014 - 2015

- Customer support via chat and tickets in English, Spanish and Italian.
